

I. Leaping	
<b>A</b> Initial stage	<ol style="list-style-type: none"> <li>1. Child appears confused in attempts</li> <li>2. Inability to push off and gain distance and elevation</li> <li>3. Each attempt looks like another running step</li> <li>4. Inconsistent use of takeoff leg</li> <li>5. Arms ineffective</li> </ol>
<b>B</b> Elementary stage	<ol style="list-style-type: none"> <li>1. Appears to be thinking through the action</li> <li>2. Attempt looks like an elongated run</li> <li>3. Little elevation above support surface</li> <li>4. Little forward trunk lean</li> <li>5. Stiff appearance in trunk</li> <li>6. Incomplete extension of legs during flight</li> <li>7. Arms used for balance, not as an aid in force production</li> </ol>
<b>C</b> Mature stage	<ol style="list-style-type: none"> <li>1. Relaxed rhythmical action</li> <li>2. Forceful extension of takeoff leg</li> <li>3. Good summation of horizontal and vertical forces</li> <li>4. Definite forward trunk lean</li> <li>5. Definite arm opposition</li> <li>6. Full extension of legs during flight</li> </ol>
II. Developmental difficulties	
<ol style="list-style-type: none"> <li>A. Failure to use arms in opposition to legs</li> <li>B. Inability to perform one-foot takeoff and land on opposite foot</li> <li>C. Restricted movements of arms or legs</li> <li>D. Lack of spring and elevation in push-off</li> <li>E. Landing flat-footed</li> <li>F. Exaggerated or inhibited body lean</li> <li>G. Failure to stretch and reach with legs</li> </ol>
