

I. Trapping/Collecting	
A Initial stage	<ol style="list-style-type: none"> 1. Trunk remains rigid 2. No "give" with ball as it makes contact 3. Inability to absorb force of the ball 4. Difficulty getting in line with object
B Elementary stage	<ol style="list-style-type: none"> 1. Poor visual tracking 2. "Gives" with the ball, but movements are poorly timed and sequenced 3. Can trap a rolled ball with relative ease but cannot trap a tossed ball 4. Appears uncertain of what body part to use 5. Movements lack fluidity
C Mature stage	<ol style="list-style-type: none"> 1. Tracks ball throughout 2. "Gives" with body upon contact 3. Can trap both rolled and tossed balls 4. Can trap balls approaching at a moderate velocity 5. Moves with ease to intercept ball
II. Developmental difficulties	
<ol style="list-style-type: none"> A. Failure to position body directly in path of ball B. Failure to keep eyes fixed on ball C. Failure to "give" as ball contacts body part D. Failure to angle an aerial ball E. Causing body to meet ball instead of letting ball meet body F. Inability to maintain body balance when trapping in unusual or awkward positions
