

Culminating (Summative) Performance Assessment for Ultimate Unit

Game Play Performance Guidelines

You will be observed and evaluated on how well you can apply the knowledge, rules, and behaviors of personal responsibility and good sportspersonship during game play. You will also be evaluated on the level to which you effectively apply individual skills, tactics, and team strategies, both offensive and defensive, while playing in the ultimate class league and tournament games during the last week of the unit. I will observe you playing at least three times for five minutes to evaluate your performance using the ultimate Game Performance Assessment Instrument. This assessment procedure is not new to you; we have used modified forms of the rubric as formative assessment tools during the course of the unit as you practiced and played in smaller groups.
