
CHALLENGE CARD

I See Me

Equipment

A camera for each student (preferably the camera on a personal smartphone; if a student does not have a camera, the team must share the cameras they have)

Starting Position

The students will explore the school environment or the area the teacher has designated, alone or with a partner and a camera. The challenge is to take a close-up picture of something in nature, not a landscape photograph.

Our Challenge

The challenge is to explore nature find something interesting and take a close-up, creative photograph. When all teammates have taken a picture, they should huddle up and decide

which picture the team would like to select to email to the instructor. Once they have selected the picture, they should email the picture to the instructor.

Rules and Sacrifices

1. This is an individual activity; however, if not enough cameras are available, students will work in small groups.
2. Students need to be informed that they will be sharing their image and be prepared to discuss why they chose it.
3. Images should be of natural origin; however, if students cannot use the outside grounds, then manmade items within the school can be used.

ORGANIZER CARD

I See Me

Questions

1. What type of picture do we have to take?
2. Can we take a landscape picture?
3. What do we do after we take our picture?
